

ENVIRONMENTAL POLICY

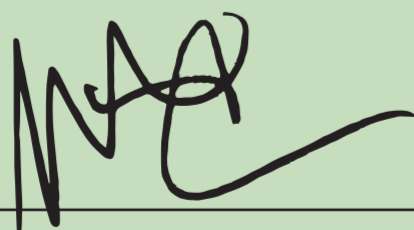

Seven Four Eight Air Services (K) Ltd is a responsible corporate citizen in the Aviation Industry, who is mindful of the environment and is committed to its protection and sustainability. We strive to minimize the environmental impact of our operations through integration into our business practices; the environmental considerations aimed at Measuring, Reducing, Monitoring and Offsetting where applicable in line with established international standards and best practices.

To achieve this, Seven Four Eight Air Services (K) Ltd will;

- ✔ Protect the environment by preventing and reducing pollution wherever practical, specifically through responsible management of our operations.
- ✔ Comply with, and exceed our environmental obligations including taking a proactive approach regarding environmental legislations that affects our operations.
- ✔ Measuring and analyzing the carbon footprint of our business activities in conjunction with other climate change mitigations efforts and strategies.
- ✔ Promoting environmental protection in procurement by continuing to make responsible environmental choices when purchasing products and services.
- ✔ Provide all employees with training and resources required to meet our environmental objectives.
- ✔ Openly communicating our policies and practices to all employees.
- ✔ Monitor and record our environmental impact on regular basis to ensure environmental performance meets the targets.
- ✔ Promote protection and enhancement of biodiversity and eco system through employee and stakeholders' involvement.
- ✔ Progressively enhancing the environmental sustainability of our activities and operations by focusing on green energy in improving Efficiency.

The Environmental Policy will be reviewed periodically, every two years or earlier to continuously improve the EMS system and enhance environmental performance.

The Accountable Manager is fully committed to the provision of all appropriate resources that will result in a culture that fosters safe practices, communications and the same attention to results as other Management Systems.
